

VT Protean Capital ELDeR Fund

March 2025 Factsheet

Fund Overview

The ELDeR Fund aims to generate income and capital growth through investments in structured products. By breaking equity-linked structured products down into their component parts, we are able to effectively manage exposures and find attractively priced opportunities with low friction costs.

Under current market conditions, the Manager anticipates:

- Annual growth of circa cash + 3.5% over the longer term

Commentary

Performance over the past year has been boosted by a range of existing positions, enabling the managers to be selective in taking on new, equity-linked exposures. Given the recent low-volatility environment for equity indices, we have been concentrating on finding defensive opportunities where the structure of the pay-off creates a high probability of achieving positive returns, and where pricing is attractive. In the rates markets, relatively high yields are available at short maturities, and the large income component to these yields adds flexibility for the managers to exploit within the ELDeR Fund's mandate.

The ELDeR Fund is currently in a sweet spot, with strong recent performance despite relatively low beta to equities. This should enable the fund to outperform in a correction. There is plenty of firepower available to the managers to exploit potential changes in market conditions.

Risk Considerations

This summary highlights some potential risks of investment. Any investment should only be made after careful review of the terms and risks set out in the Fund's prospectus which is available directly from the Fund's Authorised Corporate Director (Valu-Trac Investment Management Limited) or via their website (<https://www.valu-trac.com>).

Commodity: As an asset class, commodities can experience higher levels of fluctuation than bonds or money market securities. If the level of commodity markets were to fall significantly, the value of the Fund may be adversely affected.

Counterparty: The Fund may conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it may no longer or may only partly settle unpaid debts owed to the Fund.

Credit: If the credit quality of the guarantor of a security held within the Fund deteriorates, it may adversely impact the value of the security.

Currency: The Fund may invest in overseas securities. Movements in exchange rates may, when not hedged, cause the value of investments to increase or decrease.

Derivatives: Investments in derivatives may result in gains or losses that are greater than the original amount invested.

Equities: The value of an equity security may go up or down based on the economic performance of the issuer. Equity securities could be exposed to volatility in the market or sector in which the issuer operates as well as the volatility of the general economy.

Interest rate: Some of the Fund's financial instruments may be interest bearing. As such, the Fund may be exposed to interest rate risk due to fluctuations in the prevailing market rates.

Legal/tax: Tax regulations and concessions are not guaranteed and can change at any time. The levels of tax benefits and liabilities arising from an investment in the Fund will depend upon individual circumstances and may change in the future.

Liquidity: During difficult market conditions, some securities or larger holdings may not be able to be bought or sold quickly enough to prevent or minimise a loss
